Education

Stanford University, PhD candidate in Applied Physics

Stanford University, MS in Applied Physics, 2016

Coursework in accelerator physics, data mining and simulation, theoretical population genetics, continuum mechanics, nuclear physics, computational biology, marine embryology.

Princeton University, AB in Physics with High Honors, 2014

Certificate in Biophysics, 2014. Graduate courses in theoretical cosmology, statistical mechanics, theoretical astrophysics, and molecular biology. Departmental courses in electrodynamics, nonlinear dynamics, relativity, quantum mechanics, complex analysis, plasma physics, biophysics, and optics.

Pine View High (Sarasota, FL), 2008-2010, Cascia Hall High (Tulsa, OK), 2006-2008

Fellowships & Grants

National Geographic Young Explorers Grant, 2017.

NDSEG Graduate Research Fellowship, 2016-2019.

National Science Foundation Graduate Research Fellowship, 2014-2017.

Stanford H&S Fellowship, 2014-2019

Stanford EDGE-STEM Fellowship, 2014-2019

ODOC Princeton Senior Thesis Funding Award, 2013.

Princeton Class of 1984 Memorial Fund Fellowship, 2013.

The Fred Fox Research Fellowship, 2013.

National Science Foundation REU: NNIN/Harvard SEAS, 2012, 2013

National Science Foundation REU: Mote Marine Laboratory, 2011

Princeton Class of 1930 full tuition grant, 2010 - 2014.

Sarasota Area Ivy League Scholarship, 2010 - 2014.

Prizes

Bio-X Travel Award (for APS March Meeting), 2018

Grand prize winner, National Science Foundation “Vizzies” visualization competition, 2017

Featured winner, Physics Today magazine “Backscatter” photography contest [\[url\]](#)

Grand prize winner, Nikon Small World in Motion video contest, 2016 [\[article\]](#) [\[video\]](#)

Grand Prize (Milton van Dyke Award), APS Gallery of Fluid Motion, 2016. [\[video\]](#)

Nikon Small World photograph finalist, 2016 [\[image\]](#)

American Physical Society Travel Award, 2016.

Kusaka Memorial Prize, top graduating seniors in Princeton physics, 2014.

Allen G. Shenstone Prize, top juniors in Princeton physics, 2013.

Sigma Xi, the scientific research society, 2014.

“Art of Science” acceptee, Princeton (2013) and Stanford (2015,2017) [\[image\]](#)

A+ with special faculty commendation: Graduate Statistical Mechanics (Torquato and Car, Fall 2013), Honor and Normative Ethics (Appiah, Fall 2011).

National AP Scholar, 2010.

Publications

W. Gilpin, M. W. Feldman. “Cryptic selection forces and dynamic heritability in generalized phenotypic evolution” *Under review*.

W. Gilpin, V. N. Prakash, M. Prakash. “Dynamic vortex arrays created by starfish larvae” *Physical Review Fluids*, 2017. [\[pdf\]](#)

See feature in APS *Physics*, 2017 [\[url\]](#)

J. Y. Wakano*, **W. Gilpin*** (*co-first), S. Kadowaki, M. W. Feldman, K. Aoki. "Ecocultural range-expansion scenarios for the replacement or assimilation of Neanderthals by modern humans" *Theoretical Population Biology*, 2017

Research

Stanford University, Prakash Lab. 2014–present: 1. Studying the fluid mechanics of marine organisms. 2. Mechanical characterization and modeling of collective cell behaviors in an epithelial sheet (2014).

Stanford University, Feldman Group. 2015–present: 1. Using bifurcation theory to model the sudden exclusion of Neanderthals by early modern humans. 2. Understanding chaotic cycles in ecosystem dynamics.

Meiji University (Tokyo), Visiting Scholar. October 2016: Development of reaction-diffusion models of human migration. Guest of Profs. Joe Yuichiro Wakano and Kenichi Aoki.

Stanford University, Spakowitz Group. Spring 2015 (rotation): Modeling epigenetic regulation as anomalous diffusion of polymers. [\[code\]](#)

Stanford University, Pande Lab. Winter 2015 (rotation) A renormalization group approach to modeling protein folding kinetics. [\[code\]](#)

Princeton University, Brangwynne Lab. 2011-2014 (junior+senior thesis): 1. Characterizing and modelling the mechanical properties of *C. elegans* using a novel microfluidic approach. 2. Development of a Fokker-Planck model for growth in a population of *C. elegans*

Harvard University, Lončar Group. Summers 2012, 2013 (NSF/NNIN REU): 1. Characterizing the electrical properties of diamond NV centers using an on-chip Hall probe. 2. Engineering the charge occupancy of nitrogen vacancies in diamond nanowires. 3. Design and characterization of a diamond MOSFET.

Princeton University, Callan Group. Spring 2013 (junior thesis): Using nonequilibrium thermodynamics to model computation in biological sensing networks. [\[thesis\]](#)

Mote Marine Laboratory, Kirkpatrick Group. Summer 2011 (NSF REU): Machine learning methods for optical discrimination of phytoplankton taxa.

Talks

2016 American Physical Society, Division of Fluid Dynamics Meeting: "Vortex arrays and ciliary tangles underlie the feeding-swimming tradeoff in starfish larvae" [\[video\]](#)

2016 Meiji University (Tokyo): Mathematical biology seminar, invited by Prof. Joe Yuichiro Wakano and Prof. Kenichi Aoki.

2016 Tokyo University of Agriculture and Technology: "Dynamic vortex arrays and topological defects created by starfish larvae" Invited by Prof. Yoshiyuki Tagawa.

2013 Harvard REU Convocation: "Manipulating the charge state of nitrogen vacancy centers in diamond." [\[image\]](#)

2012 NNIN Convocation: "Controlling the charge occupancy of nitrogen vacancy centers in diamond" [\[video\]](#)

2012 Harvard REU Convocation: "Controlling the charge occupancy of nitrogen vacancy centers in diamond."

2011 Mote Laboratory REU Convocation: "Improving taxal resolution in the Optical Phytoplankton Discriminator"

Professional Employment

Khan Academy Content Specialist. Write and illustrate physics passages and questions for an AAMC/Khan Academy program to create free online MCAT preparation materials. Confer with professional educators and physicists in order to improve content and structure of passages and questions. July 2014 – July 2016. [\[example passage\]](#)

Venice Theatre Technical Apprentice Program. A 3 Year (1,500 hour) Apprenticeship, nationally certified as a Stage Technician by the U. S. Department of Labor, Bureau of Apprenticeship and Training. Travelled to Ontario, Canada for a one week work-study at the Stratford Shakespeare Festival. Worked as lighting director for various theatre productions and student films at Princeton. Tools: programming robotic lights, developing and implementing stage lighting and electrical schemes. March 2008 – April 2012.

Freelance digital illustration work. Produced illustrations for Khan Academy, Voices of Change, and various groups. Tools: Adobe Illustrator, Photoshop, InDesign, AutoCAD, HTML/CSS. [\[gallery\]](#)

Outreach

Peer review for *Bioinformatics* and *Theoretical Population Biology*

Personal science blog with tutorials on home-built science projects like Tesla coils, 50,000 unique visitors. Summer 2010, ongoing. [\[url\]](#)

NanoDays science demonstrator and educator with Brangwynne Group (March 2012, 2013) and Harvard SEAS (June 2012, 2013). [\[url\]](#)

Princeton peer tutor. Meet weekly with students in introductory math, science, and Latin courses. 2010-2014

Interests

Fossil and mineral collecting since elementary school; currently catalogue of ~8000 fossil shark teeth, 400 other fossils, and 200 unique rocks and fluorescent minerals. Former mem-

ber of Tulsa Rock Mineral Society, Sarasota Area Rockhound club. [\[collection\]](#)
Hobby photography. Several photographs have been used as backgrounds in the Yahoo! Weather mobile app. Also appeared in *plain china* and the Nassau Literary Review. [\[images\]](#)
Five years of Latin, two in college, three in high school.
Certified HAM radio operator, call sign KJ4NLQ.
